PROFESSIONAL SUMMARY

Results-driven Backend Developer with 2 years of professional experience building scalable, production-ready REST APIs and enterprise-grade web applications. Hands-on expertise delivering government projects for Telangana State Police — including an Arms License Management System and a Material Management System used across police stations statewide. Specializes in NestJS, Node.js, PostgreSQL, and TypeScript with a strong focus on multi-role approval workflows, secure authentication, and clean backend architecture.

TECHNICAL SKILLS

Frontend	HTML5 · CSS3 · JavaScript · TypeScript · React
Backend	Node.js · Express.js · NestJS
Database	MySQL · PostgreSQL · Prisma ORM
Tools	Git · GitHub · Docker · Postman · VS Code

WORK EXPERIENCE

Backend Developer | Sparquer

Apr 2024 – Present

- Leading backend development of government web applications for Telangana State Police Command & Control Center
- Built and maintained ALMS (Arms License Management System) — a secure government portal managing firearm license applications, approvals, and renewals across Telangana
- Developed multi-role approval workflows in NestJS with JWT-based RBAC ensuring data security across departments
- Designed PostgreSQL schemas using Prisma ORM for complex relational data across police hierarchies
- Integrated real-time status tracking and notification systems so applicants can monitor their license progress end-to-end
- Collaborated directly with client stakeholders at Command & Control Center, Telangana for requirement gathering and UAT

Junior Backend Developer | Technoshrine

Jun 2023 – Mar 2024

- Contributed to MMS (Material Management System) — a Telangana government project used by police stations across the state to requisition and track operational materials
- Implemented multi-stage order approval workflows routing requisitions through multiple authority levels before fulfillment
- Built real-time order tracking features allowing police stations to monitor material requests from submission through delivery
- Developed REST APIs using Node.js and Express.js for order management, inventory tracking, and role-based dashboards
- Managed MySQL database design and query optimization for high-volume order processing

KEY PROJECTS

ALMS — *Arms License Management System*

Client: Command & Control Center, Telangana | **Type:** Government Project | **Stack:** NestJS · PostgreSQL · Prisma · TypeScript

- ▶ A secure, enterprise-grade portal for managing arms license applications, renewals, and approvals across Telangana state
- ▶ Implemented end-to-end application lifecycle: submission → multi-role review → approval/rejection → license issuance
- ▶ Built role-based access control (RBAC) for applicants, inspectors, district officers, and admin authorities
- ▶ Integrated real-time status updates and email notifications keeping applicants informed at every stage
- ▶ Ensured government-grade data security with encrypted storage and audit trail logging for all license actions

MMS — *Material Management System*

Client: Telangana State Police | **Type:** Government Project | **Stack:** Node.js · Express.js · MySQL · TypeScript

- ▶ A statewide web platform enabling police stations to raise material requisition orders for operational supplies and equipment
- ▶ Designed multi-level approval workflow: station officer → district → headquarters — with role-specific dashboards at each level
- ▶ Built complete order lifecycle tracking — from order placement through approval, dispatch, and delivery confirmation
- ▶ Implemented live status updates so each police station can monitor their orders and receive alerts on approvals or rejections
- ▶ Optimized MySQL queries for concurrent order processing across 100+ police stations statewide

EDUCATION

B.Tech — Computer Science & Engineering (CSE)

2020 – 2024

Centurion University of Technology and Management · Odisha

CGPA: 8.0 / 10.0
